Bullion – Spot gold and silver retreated sharply on Thursday, falling over 3% and 10.5% to \$4,920/oz and \$75.3, respectively. Bullion came under pressure as firmer US labor data, including Initial Jobless Claims at 227K versus 222K expected and steady four-week averages near 219.5K, reinforced expectations that the Fed will maintain a steady policy stance. A stronger US Dollar and reduced July rate-cut bets outweighed softer Treasury yields, while easing geopolitical tensions surrounding Russia-Ukraine and renewed US-Iran nuclear discussions dampened haven demand. Silver fell amid weak US existing home sales and concerns over Chinese industrial demand ahead of the Lunar New Year shutdown. Today, Silver are up 2% to trade over \$77 on declining Shanghai Futures Exchange inventories while gold rose to \$4,990 as attention turns to US CPI data, with softer inflation readings potentially reviving expectations of policy easing and stabilizing bullion prices.

Crude Oil – WTI crude oil prices closed 3% lower on Thursday at \$62.8/bbl amid easing geopolitical tensions and renewed concerns over a potential supply surplus. The IEA expects global oil demand to grow more slowly than previously forecast this year and warned that the market could still face a sizeable surplus of around 3.73 mbpd in 2026, despite supply disruptions in January. Meanwhile, OPEC crude production fell by 439,000 barrels per day last month, mainly due to a sharp decline in output from Kazakhstan and disruptions in Iran and Venezuela. Today, oil prices remain under pressure, owing to limited global risk appetite and a reduced likelihood of near-term military action after U.S. President Donald Trump indicated that negotiations could extend for up to a month.

Natural Gas – NYMEX natural gas futures closed 2% higher to settle above \$3.2/mmBtu, supported by another massive storage draw and strong LNG export flows.

Base metals – Base metals traded weaker on Thursday, with most prices ending lower amid subdued near-term demand signals. Copper and nickel declined over 2%, with copper slipping below the \$13,000/ton mark, while aluminium remained broadly flat. The pullback came despite underlying support from a softer US dollar and a relatively tight supply outlook, as Chinese buying slowed ahead of the Lunar New Year holidays. Supply-side dynamics continue to provide a constructive backdrop, supported by ongoing disruptions. In copper, expectations of a 5% rise in refined output in 2026 suggest moderating supply growth, while mixed production trends in Chile highlight persistent supply sensitivity. Aluminium prices advanced, supported by potential smelter closures, production limits in China, and ongoing trade disruptions, all of which continue to tighten supply across key markets despite relatively weak global demand conditions.
